# Table of contents

<b>STRAIN- AND PROCESS ENGINEERING FOR POLYKETIDES PRODUCTION WITH <i>PSEUDOMONAS TAIWANENSIS</i> VLB120 IN TWO-PHASE CULTIVATIONS</b> .....	
<b>PUBLICATIONS</b> .....	<b>I</b>
<b>FUNDING</b> .....	<b>II</b>
<b>LIST OF ABBREVIATIONS</b> .....	<b>III</b>
<b>LIST OF FIGURES</b> .....	<b>IV</b>
<b>TABLE OF CONTENTS</b> .....	<b>V</b>
<b>SUMMARY</b> .....	<b>1</b>
<b>ZUSAMMENFASSUNG</b> .....	<b>3</b>
<b>1. GENERAL INTRODUCTION</b> .....	<b>5</b>
1.1 MICROBIOLOGY AND SECONDARY METABOLITES - A STORY OF SUCCESS IN HUMAN HISTORY AND CULTURE .....	5
1.1.1 <i>Future pursuit: sustainable bioeconomy</i> .....	6
1.2 SECONDARY METABOLITES - FROM OCCASIONAL BY-PRODUCT TO OMNIPRESENCE .....	8
1.2.1 <i>Usefulness of secondary metabolites for humankind</i> .....	11
1.3 BIOSYNTHESIS OF POLYKETIDES - A KALEIDOSCOPE OF CHEMISTRY BY NATURE .....	12
1.3.1 <i>PKS and fatty acid biosynthesis in close evolutionary relationship</i> .....	13
1.3.2 <i>Biosynthesis of PKS III natural products</i> .....	16
1.3.3 <i>Metabolic engineering strategies for heterologous polyketide synthesis</i> .....	18
1.4 <i>PSEUDOMONAS</i> AS BIOTECHNOLOGICAL PRODUCTION HOST .....	20
1.4.1 <i>Use of Pseudomonas for (aromatic) secondary metabolites synthesis</i> .....	23
1.4.1.1 Non-polyketide aromatic secondary metabolites .....	24
1.4.1.2 Aromatic polyketides .....	25
1.5 TWO-PHASE CULTIVATIONS - VISION OF A TRANSFERABLE MODULAR PRODUCTION PROCESS .....	26
1.5.1 <i>Aromatics production with Pseudomonas in solvent two-phase fermentations: featured and empowered by solvent-tolerance</i> .....	29
1.5.1.1 Solvent tolerance and toxicity .....	29
1.5.1.2 Process design of biphasic fermentations: Issues to be considered .....	30
1.5.2 <i>Biphasic fermentation processes with Pseudomonas</i> .....	31
1.6 AIM, SIGNIFICANCE AND OUTLINE OF THIS THESIS .....	34
<b>2. PUBLICATIONS AND MANUSCRIPTS</b> .....	<b>36</b>
2.1 A <i>PSEUDOMONAS TAIWANENSIS</i> MALONYL-CoA PLATFORM STRAIN FOR POLYKETIDE SYNTHESIS .....	37
<i>CRedit authorship contribution statement</i> .....	37
<i>Abstract</i> .....	38
<i>Introduction</i> .....	39
<i>Materials and Methods</i> .....	42
Bacterial Strains, Plasmids, and Cultivation Conditions .....	42
Plasmid construction and genetic modifications – DNA Techniques .....	42
Sampling and analysis .....	43
<i>Results and Discussion</i> .....	45
Pseudomonas as tolerant host towards the stilbenoid pinosylvin .....	45
Conversion of a phenylalanine platform strain into a pinosylvin producer .....	46
Genomic deletions to increase pinosylvin titers .....	48
Engineering the acetyl-CoA node by modulation of citrate synthase activity, ACC expression and deletion of the pyruvate shunt .....	49
Transfer to a platform strain without enhanced aromatics production .....	53
Overexpression of CgACC enhances stilbenoid production .....	55
Evaluation of platform strain GRC3Δ6MC-III by stilbenoid synthesis .....	57

<i>Conclusion</i> .....	59
<i>Declaration of competing interest</i> .....	59
<i>Funding</i> .....	59
2.2. ENGINEERED PASSIVE GLUCOSE UPTAKE IN <i>PSEUDOMONAS TAIWANENSIS</i> VLB120 FOR INCREASED RESOURCE EFFICIENCY IN BIOPRODUCTION .....	61
<i>CRedit authorship contribution statement</i> .....	61
<i>Abstract</i> .....	62
<i>Introduction</i> .....	63
<i>Materials and Methods</i> .....	66
Cultivation Conditions, Media, DNA techniques .....	66
Analysis .....	66
<i>Results and Discussion</i> .....	68
Effect of Gif <sub>2m</sub> on biomass formation in different <i>P. taiwanensis</i> strains .....	68
Effect of Gif <sub>2m</sub> on cinnamate formation by <i>P. taiwanensis</i> .....	70
Effect of Gif <sub>2m</sub> on resveratrol formation in <i>P. taiwanensis</i> .....	71
<i>Conclusion</i> .....	72
<i>Declaration of competing interest</i> .....	73
<i>Funding</i> .....	73
2.3. PRODUCTION OF (HYDROXY)BENZOATE-DERIVED POLYKETIDES BY ENGINEERED <i>PSEUDOMONAS</i> WITH <i>IN SITU</i> EXTRACTION 75 .....	75
<i>CRedit authorship contribution statement</i> .....	75
<i>Abstract</i> .....	76
<i>Introduction</i> .....	77
<i>Materials and Methods</i> .....	79
Strains and cultivation conditions .....	79
Plasmid and strain construction .....	79
Solvent screening, extraction and emulsification experiments .....	80
Sampling from production experiments and analytical methods .....	81
Statistical analysis .....	84
<i>Results and Discussion</i> .....	85
Toxicity and properties of 2,4,6-trihydroxybenzophenone and cellular response .....	85
Identification of suitable enzyme combinations for benzoate polyketide synthesis .....	88
Phenylpropanoids as by-products .....	91
Mutasyntesis with fluoro-benzoates and methyl-benzoate .....	92
In situ product removal of 2,4,6-TriHBP in two-phase cultivation .....	93
Heterologous de novo polyketide synthesis in solvent two-phase cultivation .....	96
<i>Conclusion</i> .....	99
<i>Declaration of competing interest</i> .....	100
<i>Acknowledgements</i> .....	100
<i>Funding</i> .....	100
<b>3. GENERAL DISCUSSION AND PERSPECTIVES .....</b>	<b>101</b>
3.1. ENGINEERING STRATEGIES FOR MALONYL-CoA AVAILABILITY AND FUTURE APPLICATIONS .....	101
3.2. PERSPECTIVE OF TWO-PHASE CULTIVATIONS AND SCALE-UP .....	103
3.3. CONCLUSION AND IMPACT OF THIS THESIS .....	105
<b>4. REFERENCES .....</b>	<b>107</b>
<b>5. APPENDICES .....</b>	<b>143</b>
SUPPORTING INFORMATION TO ARTICLE "A <i>PSEUDOMONAS TAIWANENSIS</i> MALONYL-CoA PLATFORM STRAIN FOR POLYKETIDE SYNTHESIS" .....	143
