Table of Contents

Table of Contents	VII
1. Introduction	1
2. Theoretical background	5
2.1. Magnetism fundamentals	5
2.1.1. Basics of magnetism	5
2.1.2. Magnetic interaction	6
2.1.3. Magnetic materials	6
2.1.4. Superparamagnetism	8
2.2. Magnetic nanoparticles	11
2.2.1. Synthesis	12
2.2.2. Characterization methods	15
2.3. Magnetic nanoparticles' relaxation dynamics	17
2.3.1. Néel relaxation	18
2.3.2. Brownian relaxation	19
2.3.3. Effective relaxation time	19
2.4. Size distribution of magnetic particles	20
2.5. Magnetic particle spectroscopy	23
2.6. Frequency mixing magnetic detection	24
3. Instrumentation	29
3.1. Standard magnetic reader system	30
3.1.1. Readout electronics	30
3.1.2. Measurement head	31
3.1.3. Measurement chain	32
3.2. Characterization of the Magnetic reader	33
3.2.1. Characterization of the measurement head	33
3.2.2. Characterization of the excitation fields	34
3.3. Measurement procedure	36
3.3.1. Analog demodulation	36
3.3.2. Measurement procedure with digital demodulation	40
3.4. Offset electromagnet module	47
3.4.1. General description	47
3.4.2. Electromagnet thermal limitation	49
3.5. Portable permanent offset magnet design	51
3.5.1. Measurement head design	51
3.5.2. Characterization of static offset and AC excitation fields	53

3.6.	Determination of the calibration factor for each measurement harmonic.....	56
4.	Sample preparation techniques.....	57
4.1.	Liquid suspension.....	57
4.2.	Immobilization onto PE filter.....	58
4.3.	Immobilization by epoxy embedding.....	60
4.4.	Assessment and evaluation of different preparation techniques	62
5.	Static magnetic offset-dependent FMMD signal.....	65
5.1.	Experimental results.....	69
5.2.	Static offset-dependent FMMD signal evaluation	71
5.3.	Amplitude of the excitation signals.....	74
5.4.	Offset-dependent FMMD signals of MNPs in different states	77
6.	Phase of the FMMD signal.....	81
6.1.	Simulation of offset-dependent FMMD signals with varying excitation phases	82
6.2.	Consequence of excitation phase desynchronization.....	83
6.3.	Experimental verification and phase characterization of the excitation fields.....	89
7.	Multiplex detection of MNP using offset-dependent FMMD signal	97
7.1.	Used Magnetic beads	98
7.2.	Instrumentation and measurement procedure.	98
7.3.	Quadratic programming optimization	99
7.4.	Sample preparation.....	100
7.5.	Binary mixture (Duplex).....	100
7.6.	Ternary mixture.....	105
7.7.	Conclusion and outlook.....	106
8.	Magnetic nanoparticles core size determination with FMMD technique	107
8.1.	Magnetic beads.....	108
8.2.	ICP-OES measurements.....	108
8.3.	Calculation of the iron mass.....	108
8.4.	Sample preparation.....	109
8.5.	Measurement procedure and data processing.....	109
8.6.	Measurement and Fit.....	109
8.7.	Conclusions	114
9.	Conclusion and future directions	115
	Bibliography	117
	Appendices.....	127
Appendix 1:	Verification of the excitation chain	127
Appendix 2:	Example of a deformed excitation field	128
Appendix 3:	Calibration of the high frequency excitation field.....	129

Appendix 4: Connection of the ESP32 module to the magnetic reader.....	130
Appendix 5: FMMD measurements of ternary mixtures	131
Appendix 6: FMMD double entry measurement head.....	132
Appendix 7: FMMD measurements with double entry measurement head.....	133
Appendix 8: Perpendicular static offset magnetic field setup.....	134
Appendix 9: Calibration of the Helmholtz coil for static offset field	135
List of Tables	137
List of Figures.....	139
List of Acronyms	145
List of publications and conference contributions.....	147
Acknowledgements	149
