<b>SUMMARY .....</b>	<b>iv</b>
<b>SAMENVATTING .....</b>	<b>viii</b>
<b>1. Introduction .....</b>	<b>14</b>
1.1 Technologies for oxygen separation .....	14
1.2 Mixed Ionic Electronic conductors (MIEC) .....	16
1.2.1 Single-phase MIEC.....	16
1.2.2 Dual-phase MIEC .....	17
1.3 Basic transport principle in Oxygen Transport Membranes (OTM) .....	18
1.3.1 Membrane configuration .....	18
1.3.2 Surface modification .....	20
1.3.3 Transport in Bulk .....	21
1.3.4 Transport in Surface .....	22
1.4 Material selection .....	23
1.4.1 Electron-conducting materials .....	24
1.4.2 Ion-conducting material .....	25
1.4.3 Selected Composite .....	26
1.5 Scope of the thesis.....	28
1.6 Best-case performance of ceria-based composite .....	32
<b>2. Impact of the sintering parameter on the microstructural and transport properties of 60 wt. % <math>\text{Ce}_{0.8}\text{Gd}_{0.2}\text{O}_{2-\delta}</math> – 40 wt. % <math>\text{FeCo}_2\text{O}_4</math> composites .....</b>	<b>44</b>
2.1 Introduction .....	45
2.2 Experimental .....	47
2.2.1 Sample preparation .....	47
2.2.2 Characterization methods.....	48
2.3 Results and discussion .....	51
2.3.1 Microstructure analysis.....	51
2.3.2 Cooling method .....	60
2.3.3 Functional properties .....	65
2.4. Conclusions .....	69
<b>3. Phase formation and performance of solid state reactive sintered <math>\text{Ce}_{0.8}\text{Gd}_{0.2}\text{O}_{2-\delta}</math> - <math>\text{FeCo}_2\text{O}_4</math> composites .....</b>	<b>76</b>

3.1 Introduction .....	77
3.2 Experimental .....	79
3.2.1 Sample preparation .....	79
3.2.2 Characterization methods .....	79
3.3 Results and discussion .....	82
3.3.1 Microstructure .....	82
3.3.2 Phase composition .....	84
3.3.3 Composite composition .....	86
3.3.4 Performance .....	87
3.4 Conclusions .....	92
<b>4. Role of Fe/Co ratio in dual phase <math>\text{Ce}_{0.8}\text{Gd}_{0.2}\text{O}_{2-\delta}</math> - <math>\text{FeCo}_2\text{O}_4</math> composites for oxygen separation .....</b>	<b>97</b>
4.1 Introduction .....	98
4.2 Materials and Methods .....	101
4.2.1 Sample preparation .....	101
4.2.2 Characterization methods .....	101
4.3 Results and discussion .....	105
4.3.1 Microstructure evolution .....	105
4.3.2. Permeation of the Composites .....	115
4.4. Conclusions .....	119
<b>5. Lanthanide element variation in rare earth doped ceria – <math>\text{FeCo}_2\text{O}_4</math> dual phase oxygen transport membranes .....</b>	<b>125</b>
5.1 Introduction .....	126
5.2 Experimental .....	129
5.2.1 Samples fabrication .....	129
5.2.2 Characterization methods .....	129
5.3 Results and discussion .....	132
5.3.1 Microstructure evolution .....	132
5.3.2 Functional properties .....	141
5.4 Conclusions .....	145
<b>6. Thickness influence on the permeation of 60 wt. % <math>\text{Ce}_{0.8}\text{Gd}_{0.2}\text{O}_{2-\delta}</math> – 40 wt.% <math>\text{FeCo}_2\text{O}_4</math> composites .....</b>	<b>152</b>
6.1 Introduction .....	153

6.1.1 Transport mechanism.....	154
6.2 Experimental .....	158
6.2.1 Sample preparation .....	158
6.2.2 Characterization methods.....	159
6.3 Results and discussion .....	161
6.3.1 Microstructure of 60CGO-FCO composite.....	161
6.3.2 Surface area modification .....	161
6.3.3 Functional properties .....	165
6.4 Conclusions .....	174
<b>7. Asymmetrical configuration of the 60 wt. % <math>\text{Ce}_{0.8}\text{Gd}_{0.2}\text{O}_{2-\delta}</math> – 40 wt. % <math>\text{FeCo}_2\text{O}_4</math> composite by tape casting technique .....</b>	<b>179</b>
7.1 Introduction .....	180
7.1.1 Slurry formulation .....	181
7.1.2 Drying process.....	182
7.2 Experimental .....	184
7.2.1 Sample preparation by tape casting .....	184
7.2.2 Characterization methods.....	187
7.3. Results and discussion .....	187
7.3.1 Slurry preparation .....	187
7.3.2 Standard heat treatment profile .....	193
7.3.3 Solution of the problems.....	195
7.3.4 Heat treatment.....	196
7.3.5 Phase analysis of the membrane layer.....	200
7.3.6 Transport properties .....	201
7.4 Conclusions .....	201
<b>8. Reflections and Conclusions .....</b>	<b>206</b>
8.1 Introduction .....	206
8.1.1 Sintering parameters .....	206
8.1.2 Composite design.....	207
8.1.3 Thickness influence .....	209
8.2 Conclusions .....	211
<b>Acknowledgements.....</b>	<b>213</b>
