Investigation and implementation of improved and degradation-tolerant fuel electrodes for solid oxide cells

Alexander Schwiers

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment

Band / Volume 634

ISSN 1866-1793

ISBN 978-3-95806-762-2

Table of contents

Abbreviations	V
1 Introduction	1
2 Fundamental background	3
2.1 Solid oxide cells	3
2.2 Solid oxide cell designs.....	9
2.3 Internal reformation and carbon deposition	10
2.4 Ni-doped strontium titanium ferrite.....	12
2.5 Doped ceria.....	15
2.6 Diffusion and mass transport in solids	16
3 Experimental methods	21
3.1 Synthesis and processing techniques.....	21
3.1.1 Calcination and sintering	21
3.1.2 Dry pressing.....	24
3.1.3 Screen printing.....	25
3.2 Characterization techniques	27
3.2.1 X-ray diffraction	27
3.2.2 Scanning electron microscopy.....	28
3.2.3 Raman spectroscopy.....	29
3.2.4 Electrochemical impedance spectroscopy.....	31
3.2.5 Thermal analysis.....	35
3.2.6 Secondary ion mass spectrometry.....	36
3.2.7 Inductively coupled plasma optical emission spectroscopy.....	36
3.2.8 Rheological characterization.....	37
3.2.9 Archimedes' principle and density measurement	41
3.2.10 Specific surface area measurements	42
3.2.11 Laser diffraction spectrometry / particle size distribution analysis	43

4 Doped ceria and its interdiffusion with 8YSZ in SOC manufacturing	45
4.1 Interdiffusion experiments	45
4.1.1 Interdiffusion in powder mixtures.....	48
4.1.2 Alternative sintering of 8YSZ/10GDC powder mixtures.....	53
4.1.3 Thermogravimetric analysis of sintered powder mixtures.....	62
4.1.4 Ionic conductivity of 8YSZ/10XDC mixed phases	64
4.1.5 Interdiffusion in layered systems.....	66
4.1.6 Impedance response of symmetrical cells	70
4.1.7 Discussion.....	76
4.1.8 Conclusion.....	79
4.2 Integration of doped ceria into a FESC	80
4.2.1 Reactive sintering of an 8YSZ electrolyte	81
4.2.2 Sintering onset of doped ceria.....	84
4.2.3 Dispersant evaluation for ceria	85
4.2.4 Screen printing paste formulation and rheological characterization.....	87
4.2.5 FESC manufacturing with Ni-doped ceria fuel electrodes	93
4.2.6 Discussion.....	97
4.2.7 Conclusion.....	99
5 Ni-Exsolution electrode material	101
5.1 Motivation and obstacles.....	101
5.2 Materials synthesis and characterization	102
5.3 Microstructure and exsolution analysis.....	104
5.4 Thermogravimetric analysis.....	108
5.5 Redox and exsolution stability	111
5.6 Mechanical and moisture stability	114
5.7 Carbon degradation experiments and Raman analysis.....	115
5.8 Conductivity	118
5.9 Discussion	119
5.10 Conclusion.....	123

6 Summary and conclusions	125
Appendix A – Chapter 4	127
Appendix B – Chapter 5	141
References	147
List of tables	VII
List of figures	IX
