Artificial Intelligence Framework for Video Analytics: Detecting Pushing in Crowds

Ahmed Alia

Schriften des Forschungszentrums Jülich
IAS Series

Band / Volume 61

ISSN 1868-8489

ISBN 978-3-95806-763-9

Contents

Acknowledgements	iii
Abstract	v
Zusammenfassung	vii
Abbreviations	xiii
List of Publications and Awards	xv
Author’s Contributions	xvii
1 Introduction	1
1.1 Overview	1
1.2 Background and Motivation	1
1.3 Challenges of Automatic Pushing Detection	2
1.4 Preliminary Concepts	3
1.5 State-of-the-Art CNN-based Approaches	4
1.6 Objectives	6
1.7 Contributions	7
1.8 Ethical Considerations	8
1.9 Thesis Structure	8
2 Summary of Publications	11
2.1 Publication I: A Hybrid Deep Learning and Visualization Framework	11
2.2 Publication II: A Cloud-based Deep Learning Framework	12
2.3 Publication III: A Novel Voronoi-based Convolutional Neural Network Framework	13
2.4 Publication IV: GPS-based Data System	14
3 Discussion and Outlook	17
References	19
Publication I	25
1 Introduction	26
2 Related Work	28
3 The Proposed Framework	30
3.1 Motion Information Extraction	30
3.2 Pushing Patches Annotation	32
4 Datasets Preparation	35
4.1 MIM-based Datasets Preparation	35
4.1.1 Data Collection and Manual Rating	36

	4.1.2	MIM Labeling and Dataset Creation	37
	4.2	The Proposed Patch-based Approach	37
	4.3	Patch-based MIM Dataset Creation	41
5		Experimental Results	43
	5.1	Parameter Setup and Performance Metrics	43
	5.2	Our Classifier Training and Evaluation, the Impact of Patch Area and Clip Size	44
	5.3	The Impact of the Patch-Based Approach	45
	5.4	The Impact of RAFT	45
	5.5	Comparison between the Proposed Classifier and the Customized CNN-Based Classifiers in Related Works	47
	5.6	Framework Performance Evaluation	48
6		Conclusions, Limitations, and Future Work	49
		References	51
Publication II			57
1		Introduction	58
2		Related Work	60
3		The Proposed Framework	62
	3.1	Preprocessing	63
	3.2	Motion Descriptor	63
	3.3	Pushing Detection and Annotation	65
		3.3.1 Adapted EfficientNetV2B0 Architecture	65
		3.3.2 Adapted EfficientNetV2B0 Training	67
4		Evaluation and Results	67
	4.1	Dataset Preparation	67
		4.1.1 Data Collection	68
		4.1.2 Dataset Generation	68
	4.2	Implementation Details and Evaluation Metrics	69
	4.3	Evaluation of Our Classifier Performance	70
		4.3.1 A Comparison with Eleven Popular CNNs	70
		4.3.2 A Comparison with Customized CNNs in Abnormal Behavior Detection	71
		4.3.3 A Comparison with Related Work in Pushing Detection	73
	4.4	The Overall Framework Evaluation	73
		4.4.1 Performance in terms of Accuracy and F1-score	73
		4.4.2 Computational Time Analysis	74
5		Conclusion	76
		References	77
Publication III			83
1		Introduction	84
2		Related Work	87
	2.1	Voronoi Diagram-based Deep Learning in Computer Vision	87
	2.2	CNN-based Abnormal Behavior Detection	88
	2.3	CNN-based Pushing Behavior Detection	89
3		Proposed Framework Architecture	90
	3.1	Feature Extraction Component	90
		3.1.1 Voronoi-based Local Region Extraction	92

3.1.2	EfficientNetV1B0-based Deep Feature Extraction	95
3.2	Detection Component	96
4	Training and Evaluation Metrics	97
4.1	A Novel Dataset Preparation	97
4.2	Parameter Setup	100
4.3	Evaluation Metrics and Performance Improvement	100
5	Experimental Results and Discussion	102
5.1	Performance of the Proposed Framework	102
5.2	Comparison with Five Baseline Frameworks based on Popular CNN Architectures	103
5.3	Comparison with Customized CNN Architectures in Abnormal Behavior Detection Field	107
5.4	Impact of Deep Feature Extraction Module	108
5.5	Impact of Dummy Points	108
5.6	Performance Evaluation Against Existing Pushing Detection Approaches	110
6	Conclusion and Future Work	114
	References	116
Publication IV		123
1	Introduction	124
2	Related Work	126
3	Architecture of the Proposed System	128
4	Experimental Setup	132
5	Evaluation and Results	134
5.1	Real-World Scenario Experimental Results	134
5.1.1	Data Collection	135
5.1.2	Accuracy Evaluation	136
5.1.3	Server Computational Time	138
5.2	Simulation-based Experimental Results	140
5.3	Page Load Time Experimental Results	141
6	Conclusions and Future Work	143
	References	144
Conference Contributions		149
Software Contributions		151
