# Table of Contents

<b>Abstract</b>	<b>iii</b>
<b>Zusammenfassung</b>	<b>v</b>
<b>List of publications</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1-1 Agrogeophysics - closing the gap between plant & regional scale	5
1-2 GPR for investigating the soil-plant continuum	7
Linking GPR to SWC and root zones	10
Soil hydraulic parameters obtained from geophysical data	11
1-3 Root phenotyping in the field	12
1-4 Aims and Objectives	13
1-5 Outline of the thesis	15
<b>2 Multi-year belowground data of minirhizotron</b>	<b>17</b>
2-1 Background & Summary	18
2-2 Methods	20
2-2-1 Minirhizotron Facilities	20
2-2-2 Study Design	22
2-2-3 Ground-Penetrating Radar Data	24
Crosshole GPR Data Acquisition at the MR Facilities	24
Ground-penetrating radar data processing	27
2-2-4 Root images	27
Root image acquisition at the minirhizotron facilities	27
Root image data processing	28
2-2-5 Soil coring in the extra field	32
2-2-6 Soil sensor data	32
2-2-7 Soil water content using a mobile frequency domain reflectometry device	33
2-2-8 Soil sampling	33
2-3 Data Records	33
2-4 Technical validation	35
2-4-1 Soil Sensor Data	35
2-5 Usage Notes	35
2-5-1 Soil sensor data	36
2-5-2 Dielectric permittivity to soil water content	36
2-5-3 Soil hydraulic parameters	37
2-5-4 Updates	37
2-5-5 Above-ground data	37
2-5-6 Code availability	37
<b>3 Linking horizontal crosshole GPR variability and root information</b>	<b>39</b>
3-1 Introduction	40
3-2 Experimental setup	43
3-2-1 Minirhizotron facilities	43
3-2-2 Experiment design and agricultural practices	46
3-3 Root image measurements and processing	47
3-4 GPR measurements and processing	51
3-5 Spatial and temporal variability of the soil-plant continuum	52

3-5-1	Time-lapse root data . . . . .	53
3-5-2	Time-lapse GPR data . . . . .	56
3-6	Linking RVF with GPR permittivity variability . . . . .	61
3-6-1	Calculation of time-lapse variability analysis of GPR data . . . . .	62
3-6-2	Results and discussion of time-lapse variability of the GPR data . . . . .	64
3-6-3	Probability density function of the trend-corrected permittivity deviation . . . . .	66
3-6-4	Cross-correlation of depth dependent RVF and depth dependent GPR variability . . . . .	67
3-7	Conclusions and outlook . . . . .	70
<b>4</b>	<b>High resolution soil-root modeling for crosshole GPR data</b>	<b>73</b>
4-1	Introduction . . . . .	74
4-2	Materials and Methods . . . . .	75
4-2-1	GPR-derived soil water content considering crop roots . . . . .	75
4-2-2	Deriving root volume fraction from trench wall counts . . . . .	76
4-3	Feasibility study - petrophysical relationships considering roots . . . . .	80
4-4	gprMax forward modeling . . . . .	81
4-5	Effects of roots on the GPR signal . . . . .	83
4-6	Effects of electrical conductivity of the roots on the GPR signal . . . . .	91
4-7	Effects of the measurement frequency on the GPR signal . . . . .	92
4-8	Effects of the above-ground shoot on the GPR signal . . . . .	93
4-9	Conclusion and Outlook . . . . .	96
<b>5</b>	<b>Spatial variability of hydraulic parameters of a cropped soil</b>	<b>99</b>
5-1	Introduction . . . . .	100
5-2	Materials and Methods . . . . .	102
5-2-1	Data acquired at the minirhizotron facility Selhausen . . . . .	102
5-2-2	GPR-derived soil water contents . . . . .	103
5-2-3	Soil hydraulic modeling . . . . .	104
5-2-4	Sequential inversion . . . . .	106
5-3	Results and Discussion . . . . .	107
5-3-1	Field data set for hydraulic modeling . . . . .	107
5-3-2	One-dimensional inversion results . . . . .	109
5-3-3	Upscaling to a pseudo-3D sequential inversion . . . . .	112
5-4	Summary and Conclusions . . . . .	118
<b>6</b>	<b>Conclusions and Outlook</b>	<b>119</b>
	Advancing GPR field applications . . . . .	122
	Advancing validation approaches . . . . .	125
	Advancing analysis and field sampling through modeling . . . . .	126
	Advancing knowledge about agro-ecosystems through modeling . . . . .	126
<b>A</b>	<b>Appendix A</b>	<b>129</b>
A-1	Daily spatial permittivity deviation for the bare-field . . . . .	129
A-2	Probability density function 2018 . . . . .	131
A-3	Supplementary Material: Linking horizontal GPR variability and root information . . . . .	133
<b>B</b>	<b>Appendix B</b>	<b>151</b>
B-1	One dimensional field study – Cost function during optimization . . . . .	151
B-2	Synthetic GPR modeling using gprMax . . . . .	152
B-3	Synthetic one-dimensional field study – Different measurement intervals and added noise . . . . .	153
B-4	Correlation between $\lambda$ and $K_s$ for the upscaling results . . . . .	156
<b>C</b>	<b>Appendix C</b>	<b>157</b>
C-1	Feasibility study - petrophysical relationships considering roots . . . . .	157
C-2	Effects of roots on the GPR signal- depth 0.6 m . . . . .	158
C-3	Effects of the measurement frequency on the GPR signal . . . . .	160
C-4	Effects of the above-ground shoot on the GPR signal . . . . .	161

<b>D</b>	<b>Appendix D</b>	<b>163</b>
D-1	Introduction	165
D-2	Experimental setup	167
	D-2-1 Test site and instrumentation of the minirhizotrons	167
	D-2-2 GPR crosshole measurements and acquisition of time series	170
D-3	GPR data analysis	170
D-4	Soil water content derived from GPR and TDR data	173
D-5	Comparison of GPR and TDR soil water contents	173
	D-5-1 Soil water content time series of 2014 for the upper terrace rhizotron	176
	D-5-2 Soil water content time series of 2014 for the lower terrace rhizotron	176
	D-5-3 Direct comparison between GPR and TDR soil water content results	176
D-6	GPR soil water content variability	182
	D-6-1 Semi-three-dimensional soil water content images of the rhizotrons	182
	D-6-2 Spatial and temporal variability of GPR soil water content after rain events	183
	D-6-3 Spatial variability along the rhizotubes	185
D-7	Water content spatial distribution for different crop types	187
D-8	Conclusion and outlook	189
	D-8-1 Synthetic study: GPR wave interference close to surface	190
	D-8-2 Synthetic study: First break picking close to interfaces and soil water content gradients	191
<b>E</b>	<b>Appendix E</b>	<b>195</b>
E-1	Introduction	197
E-2	Materials and Methods	199
	E-2-1 Experimental test site	199
	E-2-2 Data acquisition	200
	E-2-3 Software tools	201
	Segmentation	201
	Feature extraction	201
	E-2-4 Analysis pipeline	202
	Pre-processing	202
	Training	203
	Segmentation	203
	Converting	203
	Feature extraction	204
	Root analysis	204
	E-2-5 Statistics, data processing and visualization	204
E-3	Results	206
	E-3-1 Neural Network model validation	206
	E-3-2 Comparison of automated and manual annotation	206
	E-3-3 Time evaluation	211
E-4	Discussion	211
	E-4-1 Availability and feasibility	211
	E-4-2 Accuracy and comparability	212
	E-4-3 Speed and efficiency	213
	E-4-4 Limitations and further improvement	214
E-5	Conclusion	214
<b>F</b>	<b>Appendix F</b>	<b>221</b>
F-1	Introduction	222
F-2	Material and methods	224
	F-2-1 Test site and GPR data acquisition	224
	F-2-2 Hydrological modelling	226
	F-2-3 GPR modeling	227
	F-2-4 Set-up for sequential and coupled inversion	227
	F-2-5 Set-up for synthetic infiltration experiments	230
	Set-up for a 1-layer soil profile	230
	Set-up for a 2-layer soil profile	230
	Automatic picking of the first arrival time	231
	F-2-6 Uncertainty Analysis	233
F-3	Results and Discussion	234
	F-3-1 Synthetic infiltration experiments	234

Response surfaces for the 1-layer soil profile . . . . .	236
Inversion results for the 1-layer soil profile . . . . .	236
Inversion results for the 2-layer soil profile . . . . .	240
F-3-2 Inversion of experimental GPR data . . . . .	244
F-4 Summary and Conclusions . . . . .	249
