Optimizing Automated Shading Systems in Office Buildings by Exploring Occupant Behaviour

Ghadeer Derbas

Schriften des Forschungszentrums Jülich
IAS Series

Band / Volume 67

ISSN 1868-8489

ISBN 978-3-95806-787-5

Contents

1	Introduction	1
1.1	Motivation	2
1.2	Research objectives	3
1.3	Research approaches	4
1.4	Thesis structure	4
2	Literature review	6
2.1	Occupant behaviour and building automation	6
2.2	Shading systems	9
2.2.1	Automated shading and their control	11
2.2.2	Assessing automated shading performance	12
2.3	Occupant interaction with automated shading system	14
2.3.1	Perceived control and comfort of automated shading systems	16
2.3.2	Triggering parameters	17
2.4	Findings based on data collection methods	21
2.4.1	Findings from laboratory experimental studies	21
2.4.2	Findings from in-situ monitoring studies	24
2.5	Occupant-centric shading design	26
2.6	Concluding remarks	28
3	Current practice of automated shading systems and their behaviour	30
3.1	Introduction	30
3.2	Common practices of shading design and operation	31
3.2.1	Methods	31
3.2.2	Case studies analysis	32
3.3	Shading system behaviour	34
3.3.1	System behaviour: Luxembourg case study	34
3.3.2	System behaviour: an experimental study	36
3.4	Evaluation of shading control strategies using simplified tools	47
3.4.1	Simplified tools	47
3.4.2	Simulation analysis results	48
3.5	Conclusions and lessons learned	52

3.6	Limitation of the study	52
4	Optimizing automated shading's design and operation: an experimental study	53
4.1	Introduction	53
4.2	Experimental design and methods	55
4.2.1	Test facility	55
4.2.2	Measured parameters and physical data acquisition	56
4.2.3	Experimental procedure	58
4.2.4	Controlled indoor environment parameters	63
4.2.5	Local weather during the experiment	67
4.3	Data analysis and metrics for performance assessment	68
4.3.1	Shade deployment metrics	69
4.3.2	Thermal comfort metrics	70
4.3.3	Visual comfort metrics	73
4.4	Results and discussions	74
4.4.1	Shading patterns	74
4.4.2	Thermal comfort results	86
4.4.3	Visual comfort results	98
4.4.4	Questionnaire results: adaptive behavioural patterns	107
4.5	Conclusions and recommendations	110
4.6	Limitation of the study	111
5	Learning from shading design and utilization: Luxembourg case study	113
5.1	Introduction	113
5.2	Case study description	114
5.2.1	Building overview	114
5.2.2	Monitored offices	115
5.2.3	Shading system design "Double approach"	116
5.3	Methods	120
5.3.1	Designer interview	120
5.3.2	Data monitoring	121
5.3.3	Questionnaire	122
5.3.4	Simulation-based analysis	123
5.4	Results and discussions	123
5.4.1	Designer interview	123
5.4.2	Data monitoring	124
5.4.2.1	System behaviour	124
5.4.2.2	User behaviour	126
5.4.2.3	Regression analysis results	129
5.4.2.4	Data mining results	134

CONTENTS

5.4.3	Questionnaire	140
5.4.4	Simulation-based analysis: daylighting and energy performance	155
5.5	Conclusions and lessons learned	159
5.6	Limitations of the study	161
6	Conclusions and future work	162
6.1	Conclusions and recommendations	162
6.2	Research contributions	166
6.3	Future work	166
6.4	Publications	167
Appendix A1		clxix
A1.1	Questionnaire: phase 01	clxix
A1.2	Questionnaire: Phase 02	clxx
A1.3	Questionnaire: Phase 03	clxxix
A1.4	Miscellaneous	ccviii
