Oxide-based All-Solid-State Batteries for and from Recycling Processes

Vivien Mirjam Kiyek

Schriften des Forschungszentrums Jülich
Reihe Energie & Umwelt / Energy & Environment Band / Volume 656

ISSN 1866-1793 ISBN 978-3-95806-806-3

Content

Abstract i

Kurzfassung iii

List of abbreviations viii

1 Introduction 1

2 All-Solid-State battery – Materials, Synthesis, Recycling 3

2.1 Current status of Li-Ion Batteries 3

2.1.1 Operation principle of a battery 3

2.1.2 Challenges in Li-Ion Batteries 5

2.2 Current development of All-Solid-State Batteries 5

2.2.1 From Li-Ion batteries to All-Solid-State Batteries 5

2.2.2 Design of All-Solid-State Batteries 6

2.2.3 The solid electrolyte 7

2.2.4 The cathode active material in composite cathodes 18

2.3 Recycling of Li-Ion Batteries 23

2.3.1 Recycling approaches for liquid Li-Ion Batteries 24

2.3.2 Recycling strategies for All-Solid-State Batteries 26

3 Manufacturing and Characterization of All-Solid-State Batteries 29

3.1 Synthesis and Processing of $Li_7La_3Zr_2O_{12}$ and $LiCoO_2$-$Li_7La_3Zr_2O_{12}$ 29

3.1.1 Powder preparation 29

3.1.2 Tape-casting 31

3.1.3 Sintering 32

3.1.4 Cell assembly 33

3.2 Materials Characterization 34
3.2.1 Particle Size Distribution 34
3.2.2 X-Ray Powder Diffraction 34
3.2.3 Scanning Electron Microscopy 35
3.2.4 Grain Size Distribution 37
3.2.5 Density 37
3.2.6 Raman 38
3.2.7 Time-of-Flight Secondary Ion Mass Spectrometry 39
3.2.8 Micro x-ray tomography 39
3.3 Electrochemical characterization 40
3.3.1 Electrochemical Impedance Spectroscopy (EIS) 40
3.3.2 Critical Current Density 43
3.3.3 Cyclo-Voltammetry 43
4 Results and Discussion 45
4.1 Part I: Recycling of the solid electrolyte $Li_7La_3Zr_2O_{12}$ 45
4.1.1 Preparation of $Li_7La_3Zr_2O_{12}$ waste production material for re-lithiation 46
4.1.2 Influence of LiOH additive on $Li_7La_3Zr_2O_{12}$ waste production material 48
4.1.3 Understanding abnormal grain growth in $Li_7La_3Zr_2O_{12}$:Ta,Al 54
4.1.4 Direct re-lithiation of $Li_7La_3Zr_2O_{12}$ waste material 75
4.2 Part II: Precursor route development 81
4.2.1 Concept of the new *in-situ* synthesis route 81
4.2.2 Pre-processing of the precursor material for the new *in-situ* synthesis 82
4.2.3 Application of the new *in-situ* synthesis route on composite cathodes 84
4.2.4 Variation of the $Li_7La_3Zr_2O_{12}$ dopants in composite cathodes 92

4.2.5 *In-situ* synthesis route for $Li_7La_3Zr_2O_{12}$ separator 93

4.2.6 Recycled La_2O_3 as precursor material for $Li_7La_3Zr_2O_{12}$ separator synthesis 99

5 Conclusion and Outlook 101
