Contents

1	Introduction	1
2	Scientific Fundamentals and State of the Art	7
2.1	Alkaline Water Electrolysis	7
2.1.1	Temperature and Pressure Influence on AWE Efficiency	9
2.1.2	Ohmic Resistance in AWE Cells	15
2.1.3	Material Stability at Intermediate Temperature AWE	16
2.2	Two-Phase Flow in Electrochemical Flow Cells	18
2.2.1	Fundamentals	19
2.2.2	Nucleation of Gas Bubbles	21
2.2.3	Importance of the Two-phase Flow in an AWE Flow Cell	22
2.2.4	Dimensionless Numbers relevant for Convective Flow in Elec- trolysis Cells	24
2.2.5	Physical Properties relevant for Two-Phase Flow Behavior	26
2.3	Fundamentals of Neutron Radiography	30
2.4	Particle Image Velocimetry	32
2.4.1	Fundamentals	32
2.4.2	Particle Image Velocimetry Measurements in Multiphase Flows	35
3	Methods and Measurement Techniques	37
3.1	Neutron Radiography	37
3.1.1	Measurement Set-up and Cell Design	38
3.1.2	Measurement Settings	42
3.1.3	Evaluation of Neutron Radiography Images with <i>Trackmate</i>	43
3.1.4	Evaluation of Gas Amount in Neutron Radiography Images	44
3.2	Particle Image Velocimetry	46
3.2.1	Cell Assembly and Measurement Set-up	47
3.2.2	Selection of Electrolyte Solution	51
3.2.3	Selection of Gas for Particle Image Velocimetry Measurements	55
3.2.4	Selection of Particle Image Velocimetry Particles	57
3.2.5	Evaluation of Particle Image Velocimetry Measurements	58
3.3	Liquid Characterization Methods	61
3.3.1	UV/Vis Measurement	62
3.3.2	Density Measurement	63
3.3.3	Viscosity Measurement	63
3.3.4	Contact Angle Measurements	67

3.3.5	Analysis of Published Measurement Data of Physical Properties of Potassium Hydroxide	68
4	Results	83
4.1	Characterization of Potassium Hydroxide Properties	83
4.1.1	Ionic Conductivity	84
4.1.2	Mass Density	91
4.1.3	Dynamic Viscosity	97
4.1.4	Summary	103
4.2	Characterization of the Model Electrolyte Solutions	103
4.2.1	Validating Measurements of the Viscosimeter Conducted with Calibration Oil	108
4.2.2	Validating Measurements for the Dynamic Viscosity and the Mass Density of the Model Electrolyte Solutions	111
4.2.3	UV/Vis Measurements Verifying the Transmission Properties of the Model Electrolyte Solutions	114
4.2.4	Summary	115
4.3	Two-Phase Flow Behavior Analyzed by Neutron Radiography	116
4.3.1	Electrochemical Behavior	118
4.3.2	Gas Layer Thickness	134
4.3.3	Gas Bubble Velocity	147
4.3.4	Contact Angle	160
4.3.5	Summary	164
4.4	Two-phase Flow Behavior using Particle Image Velocimetry	165
4.4.1	Velocity of the Liquid Phase	166
4.4.2	Comparison of Multiphase Particle Image Velocimetry Measurements with Neutron Radiography Measurements	173
4.4.3	Summary	187
5	Summary and Conclusion	189
6	Outlook	197
	Bibliography	199
	List of Figures	217
	List of Tables	225
A	Appendix	227
A.1	Characterisation of the Model Electrolyte Solutions	227
A.1.1	Viscosity Measurements	227
A.1.2	Density Measurements	231
A.2	Neutron Radiography Measurements	232
A.2.1	Measurement Procedure	232
A.2.2	Polarization Curves	245

A.2.3	Contact Angle	247
A.3	Particle Image Velocimetry	249
A.3.1	Gas Bubble Velocity	249
A.3.2	Contact Angle	250
A.3.3	Measurement Error	252
